Capacity Change																							
Existing capacity:		Amps per phase _____ A		phase		Connection capacity _____ kVA																	
New capacity:		Amps per phase _____ A		phase		Connection capacity _____ kVA																	
<i>Please refer to Aurora's Network Connections Standard for a list of available connection capacities.</i>																							
Additional information (if required): _____																							

Note:																							
1. Aurora's Network Connection standard is available from www.auroraenergy.co.nz .																							
2. The customer may be required to make a capital contribution toward the cost of developing the distribution network, in order to make a larger connection available. Aurora's capital connection policy is available from www.auroraenergy.co.nz/disclosures/capital-contributions/																							
3. Connection capacities should be carefully considered. Where network development has occurred in order to provide an over-stated connection capacity, and a capacity downgrade is subsequently requested, there may be additional capital contributions payable before the capacity downgrade will be authorised.																							
Office Use Only
